EMMANUEL NDIFREKE AKPAN

Professional Portfolio

Public Health & Monitoring, Evaluation and Learning (MEL) Specialist

Akwa Ibom State, Nigeria | akpanemmanuel21@gmail.com | +234 810 354 3458 | linkedin.com/in/emmanuel-akpan

About

I am a Public Health and MEL professional with 6+ years designing, implementing, and strengthening monitoring and evaluation systems for USAID, CDC, EU, and Commonwealth-funded health programs across Nigeria, covering maternal and child health, HIV/AIDS, and orphans and vulnerable children (OVC) programming. My work centers on data quality: I build the systems that keep program data accurate, train the people who collect it, and turn field evidence into reports that donors and policymakers can act on.

Core Competencies

- Monitoring, Evaluation & Learning (MEL) system design
- Data Quality Assessments (DQAs) and data quality audits
- Digital data collection: DHIS2, KoboCollect, ODK Collect, NOMIS, CommCare, REDCap
- Indicator tracking, logframes, and results frameworks
- Training and supervision of data clerks, volunteers, and field teams
- Donor reporting and compliance (USAID, CDC, EU, Commonwealth)
- Program documentation, success stories, and knowledge products
- Remote program operations and multi-stakeholder coordination

Professional Experience

Programs Officer

Youth Alive Foundation Africa (USAID, EU & Commonwealth-funded) — Remote & Field-based | Mar 2023 – Mar 2024

- Owned program-level M&E, aligning field activities with donor logframes and results frameworks.
- Designed transparent beneficiary selection: 500 enrolled from 4,340 applicants, fully documented for audit.
- Documented 100+ program success stories feeding donor reports and future interventions.

Community System Strengthening & Gender Officer

Applicants Welfare and Development Centre (USAID-ICHSSA) | Sep 2021 – Feb 2023

- Led community case-finding with 30+ traditional birth attendants; 95% linkage of positive cases to care.
- Built remote data-collection workflows for real-time case data across hard-to-reach sites.
- Tracked 300+ vulnerable children at 99% data completeness; trained 5 data clerks and 75 volunteers.

Monitoring & Evaluation Officer

Centre for Family Health Initiative (CDC-4GATES) | Jan 2021 – Sep 2023

- Managed 6,000+ NOMIS records at 98% accuracy through recurring remote quality checks.
- Led quarterly Data Quality Assessments across DHIS2 and NOMIS, resolving 200+ annotation errors pre-submission.
- Built internal dashboards visualizing program indicators for leadership.

Monitoring & Evaluation Assistant

Centre for Family Health Initiative (CDC-ACHIEVE) | Jan 2019 – Jan 2020

- Reviewed 500+ data points, correcting 40+ discrepancies before central submission.

- Coached volunteers on form completion and reporting protocols.

Data Clerk (Volunteer)
Centre for Family Health Initiative, Abuja | 2018 – 2019

- Entered and verified 1,000+ records at under 1% error rate.
- Organized registers, cutting document retrieval time by 40%.

Education & Certifications

- M.Sc. International Relations (In View) — University of Uyo, Akwa Ibom State, Nigeria
- B.Sc. Political Science and Public Administration — University of Uyo (2015)
- Monitoring & Evaluation Fundamentals; Data Quality Assurance (DQA); Gender & Sexual Reproductive Health — Global Health eLearning Center

Selected Work Samples

The following are unedited work samples: program reports I wrote for the Youth Alive Foundation EU-funded digital skills project in Akwa Ibom State (2023).

Work Sample 1 — Selection Report

Selection of Participants for the Digital Skill Training | Akwa Ibom State | Activity: 7–16 June 2023 | Written by Emmanuel Akpan | Submitted 3/7/2023

Executive Summary. As part of efforts to select applicants for the digital skill training of 500 women and girls in Akwa Ibom State, Youth Alive Foundation developed selection criteria to guide the selection process, which led to the selection of 580 women for the training (339 for females in digital training and 241 for women in business digital training).

Outputs. 575 women were selected for the digital skills training.

Main Objective. Selection of 500 applicants for the digital skills training in Akwa Ibom State.

Methodology. The approach involved the use of selection criteria developed by Youth Alive Foundation.

Narrative Report. As part of activities under the EU project in Akwa Ibom, Youth Alive Foundation employed social media to create awareness and provide a registration platform for the public on the upcoming training of 300 women and girls and 200 women-led businesses. An e-flier was made for the social media call and adverts to improve reach to target beneficiaries. Youth Alive Foundation made radio appearances and employed radio jingles on Passion FM and Excel FM to sensitize the public on the project and to rally women-led businesses and individuals within the ages of 18–40 to sign up for digital skills training in line with the EU project objectives. YAF was featured on the "Be Inspired Show" on Inspiration 105.9FM. The registration link was attached to the e-flier for registration on Facebook, Instagram, and Twitter, which were submitted online, while physical forms were picked up and submitted at the office.

This publicity drive contributed to 1,067 women and women-led businesses applying for the digital training in Akwa Ibom State. The selection process then began. Beneficiaries were screened by removing all male entries (7), late entries (36), double entries (190), and people residing outside the state (12).

Rationale for Selection. The aim of the project is to train 500 women comprising 300 women aged 18–40 and 200 women-led businesses, with 30% rural women. Gender was considered in the selection; persons with disability were selected because they have been excluded from opportunities such as this; unemployed persons were considered because they would be more available for the training than students; low-income earners were selected to reduce poverty; level of computer literacy was considered; and proximity to Uyo was an important factor.

Criteria for Selection — Women (18–40): Female; PWDs; unemployed; corps members; courses chosen; educational qualification; age; low-income earners; level of computer literacy (none, beginners, basic, fundamental, intermediate); location; availability for training.

Criteria for Selection — Women-Led Business (18–50): Female; PWD; business women; courses chosen; education qualification; age; level of computer literacy; availability for training; location.

Output of the selection. 1,066 persons registered and 580 were selected. Of 34 PWDs registered, 22 were selected. Of 751 women aged 18–40 registered, 339 were selected. Of 281 women-led businesses registered (274 have a business), 241 were selected.

Challenges, Lessons Learned and Recommendations. Due to the recent hike in transportation costs, most persons from Eket were excluded from the training. There is a need to identify the particular disability of PWDs to better prepare for them. Youth Alive Foundation has not met its target of 50 PWDs.

Work Sample 2 — Activity Report (Radio)

Report on Radio for the EU Project | Inspiration FM | Activity: 13/5/2023 | Written by Akpan Emmanuel Ndifreke | Submitted 31/5/2023

Executive Summary. To create awareness and educate the public on the upcoming training: Reducing Digital Gender Gap in the Niger Delta.

Outputs. Created awareness and educated the public on the upcoming digital skills training on Inspiration FM; aired project jingles on Passion FM and Excel FM.

Main Objective. Create awareness and educate the public on the digital skills training.

Methodology. The approach engaged a radio station to host a 30-minute show to discuss the training extensively, plus airing of project jingles.

Narrative Report. Radio is a tool for disseminating information, creating awareness, conducting interviews, and advertisement. Youth Alive Foundation employed radio to sensitize the public on the forthcoming digital skills training themed "Bridging Digital Gap in the Niger Delta", using Inspiration FM, one of the most popular stations in Akwa Ibom State with huge listener coverage. YAF was featured on the "Be Inspired Show", a show that promotes entrepreneurship and creativity, to educate, inspire, and create awareness of the forthcoming training.

Onyekachi Ajah and Chikodi Onyeri were hosted on 20th May 2023 by on-air personality Iquo Okon. The team shared key information: who is expected to register, the age bracket of trainees, courses to be taught such as digital marketing, data analysis, and video editing, how to register, and where to pick up registration forms. Onyeka informed the audience that the training is funded by the European Union, aims to reduce the digital gender gap in Akwa Ibom, and that YAF is working with the Niger Delta Stakeholder Initiative for Community Development and Engagement (NDSICDE, locally known as SDN) to train 500 women over three months — 300 girls and women, and 200 women-led businesses. Chikodi Onyeri informed the audience that women aged 18–40 and persons with disability are qualified to register via social media platforms or forms picked up at the office, and encouraged females with disability to apply, noting transport stipends would be provided.

Work Sample 3 — Activity Report (Radio Appearance)

Report on Radio Appearance for the EU Project | Inspiration FM | Activity: 13/5/2023 | Written by Akpan Emmanuel Ndifreke | Submitted 3/5/2023

Executive Summary. To create awareness and educate the public on the upcoming training: Reducing Digital Gender Gap.

Main Objective. Create awareness and educate the public on the digital skills training.

Methodology. The approach engaged a radio station to host a 30-minute show to discuss the training extensively.

Narrative Report. Onyekachi Ajah and Chikodi Onyeri were hosted on 20th May 2023 on "Be Inspired", a radio show on Inspiration FM that promotes entrepreneurship and creativity. The goal was to educate the public on the training and create awareness for the project. Host Iquo Okon welcomed the team and introduced Onyeka Ajah, Programs Lead Youth Alive Uyo, and Chikodi Onyeri, Volunteer Coordinator Youth Alive Foundation, to the listeners.

On what the training is about: Onyeka answered that the forthcoming digital skills training is funded by the European Union, aims to reduce the digital gender gap in Akwa Ibom, and that YAF is working with NDSICDE (SDN) to train 500 women over three months — 300 girls and women, and 200 women-led businesses — after which trainees would have gained digital skills to acquire jobs and scale up businesses.

On whether data shows women lack digital skills: Onyeka answered that a desktop survey shows a gender gap, and an ongoing survey is determining its extent.

On who qualifies: Chikodi responded that women aged 18–40 and persons with disability qualify; Onyeka added that persons with disability would be supported with stipends.

On courses: Chikodi replied data analysis, video editing, and digital marketing.

On post-training monitoring: Onyeka responded that there are plans to monitor trainees' progress to evaluate the training's impact, as Youth Alive is interested in the success of trainees.

Work Sample 4 — Meeting Summary

Summary of YDC Akwa Ibom Meeting | Venue: Virtual (Zoom) | Time: 8 pm

---

Mr Ndifreke Patrick hosted and provided updates from the last meeting. Letters had been sent to the NYC chairman, the Governor of Akwa Ibom State, the Secretary to the State Government, Hon Onofiok Luke, the Director General of the Centre of Ethics and Memorial Leadership, the Director General of the Institute of National Transformation, and the

Special Assistant to the Governor on Economy. No response has come from the letters sent yet.

Suggestions from the attendees. The host opened the floor for suggestions on engagement with stakeholders and the Governor's declaration on an Educational Fund for students with disability.

Participants emphasized the need to thread carefully regarding persons the YDC Akwa Ibom branch approaches on the AKYDF Bill sponsored by Hon Onofiok Luke: run background checks, engage the Government of Akwa Ibom State, and make the State Government understand that the AKYDF Bill provides for the Educational Fund and more. YDC needs to be more proactive in media engagement and visibility.

New members were urged to introduce the AKYDF Bill to the house; YDC Akwa Ibom should learn and understand government actors' interests and speak to them, portraying YDC as partners and not rivals.

Kingsley Atang informed the team of YAF's disappointment with the progress of the Akwa Ibom team, and stated that YDC needs an anchor to galvanize everyone, build a public awareness plan, assign tasks, project AKYDF in a positive light, understand the ask of government actors, and collaborate with them.

Mr Ndifreke shared a working document in response to the Governor's 100 million Educational Fund for Persons With Disability, for review, and appreciated everyone for joining on short notice.

Work Sample 5 — Indicator Reporting Workbook

USG OVC Custom Indicator Quarterly Summary | CFHI, FCT/AMAC (Implementing Partner: IHVN) | Q1: October–December 2018; Q2: October 2018–March 2019

About this sample. This is a PEPFAR OVC (Orphans and Vulnerable Children) custom indicator quarterly summary workbook I compiled as part of routine program reporting: beneficiary data disaggregated by sex and age band (under 1 year through 25+ years) across standard OVC indicators.

Indicators reported. OVC_SERV (beneficiaries served by the PEPFAR OVC program — active, graduated, transferred, exited without graduation), OVC_ENROLLED (new beneficiaries enrolled), and related service-delivery indicators, each broken down by age/sex cohorts.

What it shows. End-to-end indicator reporting discipline: compiling facility and community data into donor-format quarterly summaries, keeping disaggregations consistent across quarters, and maintaining an auditable record of program reach. Q1 captured 3,862 male beneficiaries served across age bands; Q2 continued the series with updated enrollment, graduation, and exit figures.

Source document: USG_CUSTOM_IR_CFHI.xlsx (two quarterly sheets: CFHIQ1, CFHIQ2).

Work Sample 6 — Program Activity Report (Gender)

Gender Norms Sessions Report | ICHSSA 1 Project, AWANDEC | March 2022 / Quarter 2 FY22 | Submitted by Applicants Welfare & Development Centre | Reported by Akpan Emmanuel Ndifreke, CSS/GO | Submitted 24/3/2022

Executive Summary. Facilitating community gender norms sessions is important in enhancing gender discourse among community members. The sessions facilitate exploration of the interrelationships between gender, child protection, and HIV, while supporting individual, family, and community-level action plans to mitigate the impact of negative gender norms. Topics covered: gender and sex, female child education, gender-based violence, gender and child protection, male involvement and women empowerment, and sexual and reproductive health education for adolescents.

Reach. In March 2022, 1,092 participants (385 male, 707 female) were reached with gender norms discussions across 15 communities in four LGAs of Akwa Ibom State (Okobo, Udung Uko, Urueoffong Oruko, Mbo). Sixteen facilitators delivered 10 sessions for parents/caregivers and age-appropriate sessions for youths/adolescents aged 10–17, with illustrations shown during group discussions.

Participation by LGA. Okobo: 670 participants; Mbo: 262; Urue Offong Oruko: 100; Udung Uko: 60. Caregivers: 533; adolescents: 559.

Progress Narrative. Community-wide mobilization was done by community case workers alongside AWANDEC staff. Sessions opened with introductions of the project and its goal — ensuring vulnerable children are cared for by their families and communities — followed by ground rules, discussion guides, and illustrations. Discussions were

participatory: caregivers shared parenting styles and their effects on children; facilitators highlighted how some styles increase vulnerability to crime, abuse, and poverty. Gender perceptions increasing child vulnerability were surfaced, including the perception that women/girls are solely responsible for caregiving and household chores (hurting girls' school attendance) and prioritization of boys' needs over girls'.

Community Q&A; (selected). On the right age of marriage: the Nigerian constitution has illegalized child marriage; families were encouraged to send children to school instead. On children whose parents cannot afford school: education in Akwa Ibom is free — registration and uniform are the only costs — and the organization would mobilize support to re-enroll the child.

Output. 1,060 participants (407 male, 653 female) completed 10 gender norms sessions across the four LGAs.

Outcomes. Participants now know the difference between sex and gender; identified negative gender roles in the community and ways to stop them; and understand the need for male involvement in child training.

Challenges & Recommendations. Lack of available funds created a vacuum in which beneficiaries forgot what was taught — funds should be made available to continue sessions. Follow-up: gender mainstreaming in households during home visits and service provision.

Source document: Gender_Norms_Report_march.docx.

Work Sample 7 — Quarterly Program Report (Community Systems)

Community System Strengthening Report | Integrated Child Health and Social Service Award (ICHSSA 1), AWANDEC | Akwa Ibom State | Reporting period: January–March (Quarter 2/2022) | Submitted by Akpan Emmanuel Ndifreke, Community System Strengthening / Gender Officer | Submitted 31/3/2023

Executive Summary. In February, AWANDEC facilitated the provision of 200 birth certificates to 200 OVC across four implementation LGAs: Form B1 was distributed to Community Case Workers to capture details of OVC without birth certificates, taken to communities to obtain the necessary information, forwarded to NPOPC for documentation and certification; completed certificates were retrieved, photocopied into OVC household folders, and originals handed to beneficiaries. In January, AWANDEC introduced Quality Improvement to the Child Protection Committee in Ekeya community, Okobo LGA — enlightening members on their responsibilities: identifying vulnerable children's needs, analyzing causes, agreeing on changes, and meeting regularly to evaluate progress. AWANDEC also held a dialogue session in Obufi community, Okobo LGA, on child abuse, soliciting Child Protection Committee members' support in addressing it.

CSS Strategy. Birth registration: OVC without birth certificates were extracted from folder audits; tracked OVC were issued Form B1, correctly filled by Community Case Workers and returned to the AWANDEC sub-office in Okobo, then taken to NPOPC for certification. Quality improvement: the CSS officer met the CPC in Ekeya to establish a Community Quality Improvement Team (CQIT).

Accomplishments. Output 1 — community structures against HIV stigma and discrimination: 8 existing CIT/CPC structures managed across LGAs (Okobo 5, Mbo 1, Udung Uko 2); community dialogue session in Okobo/Obufi on out-of-school children (13 attendees: 5 male, 8 female). Output 2 — birth registration: collaboration with government (NPOPC) and communities delivered 200 birth certificates, photocopied, entered into NOMIS, filed, and delivered to caregivers. Outputs 3–7 tracked child-rights promotion, LGA accountability systems, costed OVC plans of action, and resource mobilization from public and private sources.

Challenges & Way Forward. Low CSS activity due to the cashless policy, delayed fund releases, elections, and fuel hike. Plans for next period: birth registration for unregistered children, set up 2 CIT/CPC in Urue Offong, and participate in LGA QIT meetings in Mbo and Okobo.

Source document: AWANDEC_CSS_REPORT._MARCH_2023.docx.

Work Sample 8 — Community Meeting Report (PMTCT)

TBA Meeting, Udung Uko | ICHSSA 1 Project, AWANDEC | May / Quarter 3 | Submitted 25/5/2022 | Reported by Akpan Emmanuel Ndifreke, CCS&GO, AWANDEC | Reviewed by Arit Udoakagha, Program Manager

---

Executive Summary. AWANDEC is committed to reduction of HIV transmission from mother to child. One of the major ways to achieve this is to strengthen referral coordination between traditional birth attendants and the health

facility, alongside training of traditional birth attendants and sharing of best practice — strengthening prevention of mother-to-child transmission, reducing infant, prenatal and postnatal mortality, and protecting TBAs from occupational hazards.

Progress Narrative. Traditional birth attendants are the structure supporting women who cannot afford modern medicine; the institution has birthed many children and supported rural and less-privileged families. AWANDEC attended the TBA meeting at Mrs Alice Atti Okpo's compound, Eyotai, Udung Uko, at 3 pm on 12th May 2022, with two agenda items: strengthening referral coordination and sharing best community practices. I welcomed the attendants and acknowledged their work despite busy schedules. TBAs raised concerns: Atim Asukwo reported lack of materials and no recent training; Helen Joseph noted the monitoring team had not visited her practice; Madam Alice complained that facility staff do not regard TBAs as health practitioners.

Output. 18 persons in attendance (3 male, 15 female).

Challenges. Lack of funds; lack of support from the facility, which does not regard TBAs as health practitioners and does not allow meetings at the facility; no training from the facility.

Recommendations & Follow-up. Engage stakeholders at the facility; a visit to the facility with the community program monitor and linkage facilitators to address the TBAs' concerns.

Source document: AWANDEC.TBA_REPORT_UDUNG_UKO._May.docx.

Work Sample 9 — Stakeholder Meeting Report (Child Protection)

LGA Task Team Coordination Meeting | ICHSSA 1 Project, AWANDEC | Okobo LGA | May / Quarter 3 | Meeting: 27/5/2022 | Submitted 30/5/2022 | Reported by Akpan Emmanuel Ndifreke, CCS&GO, AWANDEC | Reviewed by Arit Udoakagha, Program Manager

---

Executive Summary. AWANDEC is committed to driving policies that protect children in their communities while strengthening existing community structures for a rights-based approach to child protection, involving gatekeepers in safeguarding children from harm and abuse. Within the reporting month, AWANDEC set up a Task Coordination Team in Okobo to address: stigma against HIV-positive persons and children, gender-based violence and violence among partners, and the increase in out-of-school children.

Progress Narrative. Following increasing reports of out-of-school children, stigmatization, and gender-based violence across project communities, AWANDEC collaborated with partners and stakeholders to set up the Local Government Task Team on 27th May 2022 at Chief Odiong Joseph's compound, Awat community, Okobo. Thirteen stakeholders attended, including a member of the judiciary, community health workers/OTZ facilitator, social welfare officer, the Awat village head, a clergyman, a youth leader, and a traditional birth attendant. The facilitator educated the team on stigma — how to reduce it, the referral pathway for cases, and its dangers (depression, aggravated spread of the virus, death) — and surfaced cultural misconceptions discouraging people living with HIV from seeking care. The CSS officer spoke on gender-based violence and its dangers to family, child, abuser, abused, and community. The legal officer covered the legal ramifications of stigmatization and GBV, reminding the group that every Nigerian is protected by the constitution and of the human rights condemning victimization. In Q&A;: on helping an HIV-positive person — refer them to a health center or hospital; on new cases — report through the referral pathway; on abusers — report to the appropriate authority. A team was set up under Mr Eno as chairman to handle stigma and GBV cases.

Output. 13 persons in attendance (11 male, 2 female).

Outcomes. A task team established to address issues from the dialogue; participants gained knowledge of the HIV referral pathway; GBV, stigma, and discrimination discussed.

Challenges & Recommendations. Late arrival of participants limited detailed discussion, especially on out-of-school children — to be discussed elaborately at the next meeting.

Follow-up. Set up the committee; identify schools using students for personal farming and report them; set up a youth team to monitor loitering during school hours; fine families of children seen farming or loitering during school hours.

Source document: AWANDEC._TASK_TEAM_CORDINATION_REPORT.._MAY.docx.

Work Sample 10 — Monthly Activity Report (OVC Program)

Monthly Activity Report | ACHIEVE OVC Project, Centre for Family Health Initiative | January 2019

Overview. The ACHIEVE OVC Care & Support project is a yearlong activity providing care and support to assess, enroll, and provide interventions to vulnerable children infected and/or affected by HIV & AIDS under the age of eighteen and their households in AMAC: advocacy and sensitization on stigma reduction, health education at community and household levels, functional child protection committees and networks, tailored educational services, shelter and care services, mapping of economic resources, and a referral system linkage to other services.

Objectives for January. Follow up on assigned facilities for referral and viral load monitoring; implement planned community and facility activities.

Activities carried out. Coordination of PSS activities (kiddies, adolescent, AGYW, gender norms meetings) across four communities; IYCF support group meetings across two communities; tracking, viral load monitoring, and referral coordination across six assigned facilities (Maitama District Hospital, Kabusa CHC, Shereti PHC, Lugbe PHC, Medical Missionaries of Mary, Mabuchi PHC); community volunteer review meeting and mentoring; data mop-up and update; identification and selection of 90 caregivers for FMP training in Kabusa; participation in the NTT monitoring team for non-venue-based key population mapping and population size estimation in Calabar; follow-up on MICSEP beneficiaries; hosting the IHVN program and M&E team for technical assistance; payment of WAEC/NECO registration.

Outputs. 371 children (205 M, 166 F) reached with PSS through kiddies clubs across 3 communities (target 300); 241 adolescents (118 M, 123 F) reached with life skills; 50 adolescent girls and young women reached with SRH issues (target met); 312 caregivers (15 M, 297 F) increased knowledge on values through gender norms meetings; 47 breastfeeding women participated in food demonstrations; 38 community volunteers mentored on proper data capturing and facilitation; complete viral load information and PEPFAR ID updated for 58 reactive VC; 5 students had WAEC/NECO registration fees paid.

Challenges. Double entries still being found in NOMIS — the M&E unit is mopping up data and re-training volunteers. The reactive VC line list sent to IHVN was reduced to 39 due to incomplete viral load information or missing PEPFAR IDs; the team is working through caregivers and hospital staff, and the number has risen from 39 to 58.

Next steps. Coordinate planned community and facility activities; advocacy visits to schools for education block grants; volunteer review meeting; commence HES assessment; prepare February work plan, activity profiles, and volunteer stipends; send monthly reports.

Source document: CFHI_ACHIEVE___Other_Projects_Report_for_January_2019.docx.

Work Sample 11 — Community Meeting Report (Child Protection)

CPC Meeting Report, Anua, Okobo LGA | Community System Strengthening, ICHSSA 1 Project, AWANDEC | March / Quarter 2 | Submitted 31/3/2022 | Reported by Akpan Emmanuel Ndifreke, CCS&GO, AWANDEC | Reviewed by Arit Udoakagha, Program Manager

---

Executive Summary. As children remain exposed to conflict, violence, neglect, and abuse, the Community-Based Child Protection / Quality Improvement Committee is essential to mobilize community responses, enhance referrals, raise awareness on child rights, and ensure communities take part in creating a protective environment for children. A regular CPC meeting was held in Anua, Okobo LGA, to address emerging issues and proffer solutions.

Progress Narrative. The meeting held on 29th March 2021 at Chief Joseph Okon Esuk's compound at 4:45 p.m., opening with prayer by Engineer Effiong Effiong. Agenda: issues of identification, abuse and molestation, and bullying in school. Chief Joseph Okon complained the group has no means of identification — I responded that it would be looked into internally, though not covered in the budget. Mr Clement Emmanuel reported bullying in Community Secondary School making some children recalcitrant while victims were scared of attending school — I proposed a visit to the school authority to address it before it escalates, which the chief supported. The secretary raised abuse and molestation as a factor behind bullying, citing a past case and its resolution. The meeting closed with prayer by Madam Martha.

Output. 9 persons in attendance (8 male, 1 female); school bullying issues addressed.

Challenges. Too many community activities coupled with the farming season made holding the meeting difficult; means of identification.

Recommendations. Visit the school authority to look into the bullying matter.

Source document: ANUA_CPC_REPORT.._MARCH.docx.

Work Sample 12 — HTS Reporting Dashboard

CSN HTS Report | HIV Testing Services Weekly & Daily Reporting | Akwakuma HTS & Mbeiri HTS | Dated 16/8/2021

About this sample. An HIV Testing Services (HTS) reporting workbook I maintained: daily test figures (total tested, positive, negative, yield) feeding into weekly summaries and a dashboard, with a monthly summary by fiscal year.

Structure. Four sheets: DASH BOARD (weekly positives, negatives, totals, and yield rates across FY21–FY22, plus monthly summary), GRANULAR ANALYSIS, AKWAKUMA HTS (daily reports from April to October 2021 — e.g. 440 tested / 40 positive on 31/8/2021), and MBEIRI HTS (daily reports from September to November 2021).

What it shows. Routine service-delivery data management: capturing daily testing outputs, computing positivity yields, aggregating to weekly and monthly donor-format summaries, and keeping a running dashboard for program monitoring.

Source document: CSN_HTS_REPORT._16.8.2021.xlsx.

Work Sample 13 — GBV Sensitization Activity Report

Activity Report: Sensitization of Catholic Women Organisation, St. John's Parish, Abak Road, Uyo | Youth Alive Foundation (SAVE Project) | 20th May 2023

Purpose. Sensitize the Catholic Women Organisation of St. John's Parish, Uyo, on the provisions of the VAPP law: how and where to report gender-based violence, abandonment of children and spouses, rape, and abuse, and how to curb them.

Activity narrative. Youth Alive Foundation led the SAVE cluster with the FIDA Chairperson and Vitonia Lead team to the parish. The sensitization opened with a visual play dramatizing spousal abuse and the VAPP law's protections — performed in English, pidgin, and Ibibio — which drew warm applause and opened the audience to the message. The FIDA Chairperson then broke down key punishable offences under the law (spousal battery, rape, sexual abuse) and shared reporting hotlines. The Q&A covered how to report abandonment and how an indigent, dependent wife can leave a marriage. One woman shared a success story: after FIDA intervened, her colleague's husband stopped the abuse and now cares for their children. The association's president appreciated the team and asked YAF to also speak to the men of the church.

Attendance. 87 participants (87 female, 0 male), including 3 women-led organizations.

Key outcomes. The women were equipped with knowledge of the VAPP law and its provisions; reporting phone numbers and reporting centers were shared.

Challenges. Some women are scared of reporting violence and abuse due to stigma and societal norms.

Next steps. Sensitize the men of St. John's Catholic Church on the VAPP law.

Source document: CWO_REPORT.20_MAY_2023_0_6ks2.docx.

Work Sample 14 — Educational Performance Assessment Tool

Educational Performance Assessment Tool | OVC School Performance Tracking Workbook

---

About this sample. A data collection and assessment tool I built for tracking the educational performance of vulnerable children across supported schools.

Structure. Three sheets: DASHBOARD (summary view), EDUCATIONAL PERFORMANCE (the assessment register — S/N, name, unique ID, age, sex, HIV status), and a lookup sheet with dropdown lists of FCT communities (Kabusa, Jiwa, Jahi, Dape, Waru, Gishiri, Dei Dei, and others), schools (Government Secondary School Angwan Shawu, GSS Gosa, JSS Karmo Sabo, LEA schools, and others), class levels (Pre-Nursery through SSS 3), and months — standardizing entries for clean, analyzable data.

What it shows. Tool design for routine program monitoring: structured registers, standardized dropdowns to prevent entry errors, and a dashboard layer — the kind of practical M&E instrument that keeps field data consistent across many collectors.

Source document: EDUCATIONAL_PERFORMANCE_ASSESMENT_TOOL.xlsx.

Work Sample 15 — Volunteer Service Tracking Tool

Service Track Tool | Monthly Volunteer Service & Household Graduation Tracking

---

About this sample. A service tracking workbook I designed for monitoring community volunteer outputs and household graduation across supported communities.

Structure. Five sheets: DASHBOARD plus monthly sheets for APRIL, MAY, and JUNE, each listing volunteers by name and community (Lugbe, Sauka, Kabusa, Jahi, Gishiri, Sabo-lugbe, Old Karimo, Angwa-sayawa, and others) with columns for services delivered (households and vulnerable children) and graduations; and a Q3 sheet summarizing household graduations and services served by community and month.

What it shows. Routine service-delivery monitoring: tracking who delivered what, where, and to whom, month by month — the operational backbone of community case management reporting.

Source document: SERVICE_TRACK_TOOL1.xlsx.
